Main activities

AviaAM Leasing is a holding company together with its subsidiaries (referred to as “the Group”) established to acquire, lease and trade commercial aircraft. The Group’s primary focus is on the market for used aircraft, primarily on aircraft of ten years of age or older. The Group is principally engaged in purchasing commercial aircraft which the Group, in turn, lease to airlines around the world to generate attractive returns on equity. The Group leases its aircraft to airlines pursuant to net operating (“dry”) leases that require the lessee to pay for maintenance, insurance, taxes and all other aircraft operating expenses during the lease term.

In addition to aircraft operating lease activities, the Group is actively engaged in aircraft trading business through acquiring, refurbishing and subsequent sale of aviation assets. Through long-standing relationships and extensive market knowledge, the Group acquires aircraft from airline operators, other lessors, trading entities, financial institutions and directly from the manufacturers. These acquisitions are made with the intent of subsequent sale of the aircraft either in “as-is” condition or after performing certain technical modifications in order to meet the client’s requirements.

While Group’s primary business is to own, lease and trade aircraft, the Group also provides consulting, aircraft transaction management and remarketing services to third parties for a fee. These services are similar to those the Group performs for its fleet, including leasing, re-leasing, lease management and sales services. Thanks to Group’s extensive market intelligence gathered from its daily contacts with other market participants, the Group is well positioned to advise its clients on the best terms and conditions available in the market, and to provide assistance and know-how to its clients in the field of structuring and maintaining their aircraft portfolios.

Other revenue	135	121	84	76
	50,597	44,804	89,531	80,863

The revenue from aircraft leases (i.e. lease revenue and supplemental maintenance rent) accounted for 45.1% of total revenue in the twelve month period ended 31 December 2017, as for the same period in 2016 the revenue from aircraft leases accounted for 30.1%. In turn, the revenue from aircraft sales accounted for 31.7% of total revenue in 2017 as compared to 49.0% for the year ended 31 December 2016.

The lease revenue decreased by 20.0% to USD 14.7 million (EUR 13.0 million), at the same time supplemental maintenance rent decreased by 4.9% in the twelve month period ended 31 December 2017 as compared to the same period in 2016. The decrease in lease revenue is mainly attributable to decrease in aircraft on lease (14 aircraft were on lease as of 31 December 2017, while 16 aircraft were on lease as of 31 December 2016).

Decrease in sales of aircraft by USD 27.8 million (EUR 25.4 million) in the twelve month period ended 31 December 2017 to USD 16.1 million (EUR 14.2 million) as compared to USD 43.9 million (EUR 39.6 million) in the same period in 2016 resulted from lesser number of aircraft being traded (i.e. one aircraft in 2017 as opposed to four aircraft in 2016).

Decrease in supplemental maintenance rent by 4.9% in the twelve month period ended 31 December 2017 to USD 8.2 million (EUR 7.2 million) as compared to USD 8.6 million (EUR 7.7 million) in the same period in 2016 mainly resulted from the higher number of aircraft being leased in the year 2016.

Such decrease in the recorded commission income is primarily attributable to the different nature of aircraft transaction management services rendered in the year 2017 and as a consequence the revenues from aircraft transaction management services were netted with related costs of rendering such services and recognized as commission income for the year ended 31 December 2017.

For this purpose the fair value measurements by independent appraiser – IBA Group Limited – were performed as a basis for the impairment test. As pursuant to the Group’s accounting policy, which was changed in 2016, aircraft and other tangible fixed assets are carried at their historical cost less accumulated depreciation and any accumulated impairment loss, the net difference between the fair value and the book value of the aircraft portfolio was recognized as an impairment loss. Revaluation of investment property income (expenses) are attributable to the fact that pursuant to the accounting policy of the Group investment property is also carried at revalued amounts being fair value at the end of each annual reporting period. During the year ended 31 December 2016 the decrease by USD 596 thousand (EUR 538 thousand) in values of the investment property owned by the Group was recognised in profit and loss, no value change was recognized during the year ended 31 December 2017.

- Changes in the market lease rates and aircraft prices;
- Changes in currency exchange rates;
- Increase in competition from other aircraft lessors;

Foreign exchange risk is controlled by entering into most contracts in the functional currency (USD) and monitoring exposures to other currencies.

Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and loans granted.

Credit risks are controlled by the application of credit terms and monitoring procedures. Group's procedures are in force to ensure that services are sold only to customers with an appropriate credit history and do not exceed acceptable credit exposure limit. Cash transactions are limited to high credit quality financial institutions.

Risk of credit concentration is determined by the Group in relation to industry in which Group's debtors operate. Concentration of credit risk of the Group arises from loans granted and receivables from related parties, trade receivables. The only material credit risk concentration is with debtors operating in aviation business.

Liquidity risk management implies maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities. Liquidity risk is managed by the General Manager, who is required to maintain a minimum required liquidity position.

In addition, the Group's liquidity management policy involves projecting cash flows and considering the level of liquid assets necessary to meet these.

Plans and forecasts

The Group intends to further follow a disciplined approach to future aircraft acquisitions, seeking to create a portfolio of aircraft in the niche markets for used, midlife to end-of-life (generally, ten years of age or older) narrow body jet and regional aircraft and to further expand its activities in the fields of aircraft trading and management. To execute this strategy, the Group will focus on the following:

- Generating higher yields: the management of the Company believes the aforementioned target assets typically have higher lease rates relative to their purchase price (i.e. as the lease rate factor) than newer aircraft, thus allowing the Company and the Group to generate attractive, cash-on-cash yields;
- Identifying transactions that are not widely marketed: through the management's relationships with aircraft lessors, financial investors and brokers, the Group expects to have access to transactions that are not widely marketed;
- Strategically acquiring attractive assets during market weakness: while the Group intends to be active in the aircraft leasing market throughout market cycles, the Group will seek to take advantage of the cyclicity in the aviation industry by opportunistically acquiring selected aircraft during market downturns;
- Providing for flexible resales and part-out: the Group expects to employ a flexible divestment strategy to allow to sell assets when the market cycle makes asset sales most advantageous;
- Focusing on high growth markets: the Group is primarily focused on the Eastern European, Russian and CIS markets; however due to the nature of the aircraft operating leasing business the Group is seeking for expansion of the geography of operations into other markets such as Western Europe, Middle East and Southeast Asia.
- Expanding the scope of services provided by the Group: in addition to aircraft leasing and trading business lines, the Group intends to further expand its aircraft transaction management, consulting and asset management activities leveraging the successful track record of the executed transactions and experience and know-how of the management.

Acquisitions of aircraft either for leasing or trading activities will be pursued through the co-operation with aircraft operators, manufacturers, financial institutions, private investors and third party lessors.
