Main activities

AviaAM Leasing is a holding company together with its subsidiaries (referred to as “the Group”) established to acquire, lease and trade commercial aircraft. The Group’s primary focus is on the market for used aircraft, primarily on aircraft of ten years of age or older. The Group is principally engaged in purchasing commercial aircraft which the Group, in turn, lease to airlines around the world to generate attractive returns on equity. The Group leases its aircraft to airlines pursuant to net operating (“dry”) leases that require the lessee to pay for maintenance, insurance, taxes and all other aircraft operating expenses during the lease term.

In addition to aircraft operating lease activities, the Group is actively engaged in aircraft trading business through acquiring, refurbishing and subsequent sale of aviation assets. Through long-standing relationships and extensive market knowledge, the Group acquires aircraft from airline operators, other lessors, trading entities, financial institutions and directly from the manufacturers. These acquisitions are made with the intent of subsequent sale of the aircraft either in “as-is” condition or after performing certain technical modifications in order to meet the client’s requirements.

While Group’s primary business is to own, lease and trade aircraft, the Group also provides consulting, aircraft transaction management and remarketing services to third parties for a fee. These services are similar to those the Group performs for its fleet, including leasing, re-leasing, lease management and sales services. Thanks to Group’s extensive market intelligence gathered from its daily contacts with other market participants, the Group is well positioned to advise its clients on the best terms and conditions available in the market, and to provide assistance and know-how to its clients in the field of structuring and maintaining their aircraft portfolios.

	89,531	80,863	32,099	28,903

The revenue from aircraft leases (i.e. lease revenue and supplemental maintenance rent) accounted for 30.1% of total revenue in the twelve month period ended 31 December 2016, as for the same period in 2015 the revenue from aircraft leases accounted for 63.5%. In turn, the revenue from aircraft sales accounted for 49.0% of total revenue in 2016 as compared to 7.2% for the year ended 31 December 2015.

The increase in lease revenue is mainly attributable to increase in aircraft on lease (16 aircraft were on lease as of 31 December 2016, while 15 aircraft were on lease as of 31 December 2015) and relatively higher lease rental rates of aircraft acquired and leased in the year 2016 as compared with the rates of aircraft which were on lease in the year 2015.

AVIAAM LEASING AB

FOR THE YEAR ENDED 31 DECEMBER 2016

(All tabular amounts are in USD‘000 and EUR‘000 unless otherwise stated)

Increase in supplemental maintenance rent by 31.6% in the twelve month period ended 31 December 2016 to USD 8.6 million (EUR 7.7 million) as compared to USD 6.5 million (EUR 5.9 million) in the same period in 2015 mainly resulted from the higher number of aircraft being leased and higher supplemental maintenance rent rates of aircraft acquired and leased in the year 2016 as compared with the rates of aircraft which were on lease in the year 2015.

Increase in commission income by 98.1% in the twelve month period ended 31 December 2016 to USD 18.6 million (EUR 16.8 million) as compared to USD 9.4 million (EUR 8.5 million) earned during the year ended 31 December 2015 relates to the provision of aircraft transaction management services in respect to arranging the sale and lease-back transactions of twelve Airbus A321 aircraft in the year 2016 as opposed to arrangement of three Boeing B777-300ER aircraft sale and lease-back transactions in the year 2015.

Interest income on loans, revaluation of aircraft and investment property, gain on sales of subsidiaries and PPE and other gain (losses) net

	Year ended 31 December			
	USD	2016 EUR	USD	2015 EUR
Interest income on loans	1,796	1,622	1,694	1,526
Impairment loss of aircraft - net	(5,609)	(5,066)	(213)	(192)
Revaluation of investment property	(596)	(538)	403	363
Gain on sale of property, plant and equipment (net)	6,633	5,991	-	-
Other gain (losses) - net	(177)	(185)	618	556
	2,047	1,824	2,502	2,253

During the year ended 31 December 2016 the Group earned interest income on loans in the amount of USD 1.8 million (EUR 1.6 million) as compared to USD 1.7 million (EUR 1.5 million) during the year ended 31 December 2015.

Impairment loss of aircraft - net derives from the results of the impairment tests performed by the Group in respect of its aircraft at the end of the respective reporting periods. For this purpose the fair value measurements by independent appraiser – IBA Group Limited – were performed as a basis for the impairment test. As pursuant to the Group’s accounting policy, which was changed in 2016, aircraft and other tangible fixed assets are carried at their historical cost less accumulated depreciation and any accumulated impairment loss, the net difference between the fair value and the book value of the aircraft portfolio was recognized as an impairment loss. During the year ended 31 December 2016 it amounted to USD 5.6 million (EUR 5.1 million) and mainly related to the comparably lower fair values of Bombardier CRJ200 aircraft in a business-jet configuration.

Revaluation of investment property income (expenses) are attributable to the fact that pursuant to the accounting policy of the Group investment property is also carried at revalued amounts being fair value at the end of each annual reporting period. During the year ended 31 December 2016 the decrease by USD 596 thousand (EUR 538 thousand) in values of the investment property owned by the Group was recognised in profit and loss.

Gain on sale of property, plant and equipment (net) encompass net gain on sale of aircraft and its components (i.e. airframes and engines) from the Group’s portfolio. In the year 2016 the Group sold three Boeing 737-500 and three Airbus A319 aircraft with a total gain of USD 6.6 million (EUR 6.0 million) as opposed to 2015, when the Group did not sell any aircraft from its portfolio.

In addition, the other gain (losses) – net, which include other one-off items not related to the primary activity of the Group decreased by USD 795 thousand (EUR 741 thousand) in the year ended 31 December 2016 as compared to the same period in 2015. In the year 2016, total recorded amount was USD 177 thousand (EUR 185 thousand). In 2015, out of the total recorded amount USD 618 thousand (EUR 556 thousand) was attributable to the agreed net settlement amount in connection with settling the dispute with one of the clients.

The main reason of the higher depreciation expense was an increase in number of aircraft in Group's fleet (from 15 aircraft as at 31 December 2015 to 16 as at 31 December 2016) and higher carrying (book) values of aircraft acquired and leased in the year 2016 as compared with the respective values of aircraft which were on lease in the year 2015.

In the twelve month period ended 31 December 2016 the Group engaged in a higher number of aircraft trading transactions which resulted in a respective increase in costs of aircraft sold in the amount of USD 40.8 million (EUR 36.8 million) as compared to USD 2.8 million (EUR 2.5 million) for the same period in 2015.

Costs of services rendered represent costs incurred in relation to aircraft leases and commission income earned from aircraft transaction management and brokerage activities. For the twelve month period ended 31 December 2016 these expenses amounted to USD 883 thousand (EUR 797 thousand) as compared to USD 650 thousand (EUR 586 thousand) in 2015. The main factor behind the increase of these expenses was an increase in the number of employees and the level of their remuneration.

There were no impairment of receivables and prepayments in the year ended 31 December 2016 as compared to USD 752 thousand (EUR 677 thousand) recognised in 2015. It was related to impairment of loan granted to related party and lease receivables due from the Group's customers.

Other operating expenses accounted for 18% and 20% of all operating expenses in the twelve month period ended 31 December 2016 and in the same period in 2015 respectively. The major contributor of the increase of these expenses by 50.6% was an increase of travelling expenses by USD 209 thousand (EUR 189 thousand) and legal and translation expenses by USD 355 thousand (EUR 322 thousand).

(All tabular amounts are in USD'000 and EUR'000 unless otherwise stated)

Net finance costs of the Group amounted to USD 4.4 million (EUR 4.0 million) in 2016 as compared to USD 2.5 million (EUR 2.3 million) for the year ended 31 December 2015.

As a result, profit before income tax of the Group for the year ended 31 December 2016 was equal to USD 21.2 million (EUR 19.2 million) as compared to USD 13.0 million (EUR 11.7 million) for the year ended 31 December 2015.

Income tax totaled for USD 3.4 million (EUR 3.1 million) and USD 2.9 million (EUR 2.6 million) in 2016 and 2015 respectively.

As a result, the Group earned a net profit of USD 17.8 million (EUR 16.1 million) for the year ended 31 December 2016. The net profit increased by 71.1% as compared to the same period in 2015 when the net profit of the Group amounted to USD 10.0 million (EUR 9.1 million).

Balance sheet and cash flow

During the twelve month period ended 31 December 2016 total assets of the Group increased by USD 88.7 million (EUR 90.0 million) or 72.6% compared to 2015 primarily due to increase in property, plant and equipment by USD 43.1 million (EUR 43.4 million) and increase in investments in a joint venture by USD 15.3 million (EUR 14.3 million).

During the twelve month period ended 31 December 2016 total liabilities of the Group increased by USD 71.3 million (EUR 69.3 million) or 271.4% to USD 97.6 million (EUR 93.3 million) as compared to USD 26.3 million (EUR 24.0 million) in 2015. A meaningful impact to this change was an increase in borrowings by USD 48.1 million (EUR 46.5 million). This increase in borrowings was directly associated with the acquisition of four Airbus A321 aircraft which was co-financed by the funds advanced under the long term borrowing facility.

Shareholders' equity of the Group increased by 18.1% and amounted to USD 113.3 million (EUR 108.1 million) as at 31 December 2016. This increase was mainly attributable to the increase in retained earnings by USD 16.8 million (EUR 15.2 million).

Risk management

The main risk factors associated with the activities of the Group are as follows:

- Changes in the supply and demand for mid-life aircraft;
- Changes in the market lease rates and aircraft prices;
- Changes in currency exchange rates;
- Increase in competition from other aircraft lessors;
- Changes in the regulatory environment;

Description of key features of internal control and risk management systems related to the process of financial reporting

The Group's system of internal control and risk management in the process of drawing up financial statements is implemented through:

- the audit of the annual financial statements of the Company and the Group;

Plans and forecasts

The Group intends to further follow a disciplined approach to future aircraft acquisitions, seeking to create a portfolio of aircraft in the niche markets for used, midlife to end-of-life (generally, ten years of age or older) narrow body jet and regional aircraft and to further expand its activities in the fields of aircraft trading and management. To execute this strategy, the Group will focus on the following:

- Generating higher yields: the management of the Company believes the aforementioned target assets typically have higher lease rates relative to their purchase price (i.e. as the lease rate factor) than newer aircraft, thus allowing the Company and the Group to generate attractive, cash-on-cash yields;
- Identifying transactions that are not widely marketed: through the management's relationships with aircraft lessors, financial investors and brokers, the Group expects to have access to transactions that are not widely marketed;
- Strategically acquiring attractive assets during market weakness: while the Group intends to be active in the aircraft leasing market throughout market cycles, the Group will seek to take advantage of the cyclicity in the aviation industry by opportunistically acquiring selected aircraft during market downturns;
- Providing for flexible resales and part-out: the Group expects to employ a flexible divestment strategy to allow to sell assets when the market cycle makes asset sales most advantageous;

- Expanding the scope of services provided by the Group: in addition to aircraft leasing and trading business lines, the Group intends to further expand its aircraft transaction management, consulting and asset management activities leveraging the successful track record of the executed transactions and experience and know-how of the management.

Acquisitions of aircraft either for leasing or trading activities will be pursued through the co-operation with aircraft operators, manufacturers, financial institutions, private investors and third party lessors.
